Frank:

I have gone over the attached papers and am returning them for further action as follows:

a. Medical Examination of Dependents. This looks okay to me and I approve it for Agency coordination.

b. Memorandum to Director of Training. Okay

c. Reimbursement of Hospitalization Expenses for Illness or Injury Incurred While Located Abroad.

With respect to this proposed regulation, it is requested that Medical Staff representatives collaborate with the Office of Personnel and come up with a jointly agreed upon draft for my review.

(over)

As I understand it, the Office of Personnel has been working on a similar regulation covering employees only. I am very anxious to get this regulation issued and request that the draft be submitted to me no later than 15 June.

d. Field Medical Support. In line with our present effort to cut down on the size and number of regulatory issuances, I am not too sure that this proposed regulation is necessary, at least in its entirety.
